MOUNTAIN EMPIRE CHAROLAIS ASSOCIATION

Kyle Reaves(423) 723-9245

Membership in the Mountain Empire Charolais Association is available at \$25 per year. Please see Kyle Reaves to apply.

HEALTH

All cattle selling of test age, will be tested within 30 days of sale for Brucellosis and T. B. or from Free States. A proper interstate health certificate will be furnished. All females selling as pregnant will be pregnancy tested by vet and called accordingly. All bulls will be fertility tested satisfactory and non-virgin bulls will be Trichomoniasis tested.

EPDS

All EPDs are current March 2024 EPDs taken from the AICA Website.

TERMS & CONDITIONS

All sales are cash or check and settlement should be made upon conclusion of the sale. Cattle will not be released until settlement is made. Please make checks to OUTFRONT CATTLE CUSTODIAL. This sale is conducted under standard sale conditions and a copy is available at the settlement desk or by written request.

TRUCKING

A special trucking arrangement has been made to guarantee a maximum fee of \$400 per head to any central point in the continental U.S. if arranged by the sale manager. Rates for local hauls are also available at reasonable prices.

INSURANCE

Insurance is available at the settlement desk.

BIDDING

If you are unable to attend, you may phone your bid into the sale manager or AICA fieldman, and they will bid for you, in strict confidence. For details or more information, please call the sale manager.

Welcome From Outfront Cattle Service!

Welcome to the 2024 Appalachian Classic sale. This is a phenomenal offering of high-quality genetics. Especially from the Germaine cow family represented in varying ways throughout the sale! Her lineage is transmitted in females and sires, a proof that the best genetics stays in the breed due to their performance, quality, fertility, and their ability to work for many breeders.

One of the most exciting offerings is the 7 sons of Germaine 1145! Truly a shopping opportunity for the best of the best! Some might even want to look at adding a couple of these half-sibs to initiate a line-breeding program. The genetics from the sire's side represents some of the most highly sought after genetics of the breed. Sires known for performance, carcass ability, and maternal! If that is not enough, look at the potential donors that are out of Germaine 1145 and again, leading sires! Kyle is flushing some of these even before the sale. They are completely guaranteed breeders, if not pregnant by sale time. They carry mating's of some of the most lucrative and popular sires in the industry, like LT Atlas, or WC Inferno 6561!

But do not overlook the great offerings from the other consignors! Welcome Grove is selling several well-bred cows and heifers! Like Resource 417, DC/CRJ Tank E108, VPI Free Lunch 708, as well as PE breeding's to his Blue Value son out of yes, M6 Cool Germaine 1145! Flag Pond brings a tremendous Smokester, LMH a great LT Patriot daughter, Condra & P5 a Grid Maker out of the 248-donor cow, and Webb's have some of the best heifers they have ever consigned! Milhorn, a new member has a good working set of cows, and Oak Hill always with superb Quality Pairs! Little Em with their first consignment of Semen from leading sires.

Overall, a great consignment of Bulls, Females, Semen, and Embryos that can enhance any program! We are looking forward to visiting you at the sale or any time before the sale. You will be able to bid online with LiveAuction.tv. Cendra Sebolt will be their representative at the sale.

And most of all, a chance to give a big Thank You to Floyd Wampler after 31 years of service to the Charolais breed. A lot of those years devoted to helping with the Appalachian and Southern Connection sales held here in Knoxville! A very well-deserved retirement after a total dedication to the Charolais breed and more importantly to the Charolais breeders!! Personally, I have been very blessed to work with Floyd for all 31 years. The friendship that developed traveling many miles together, working on photos, looking for motels late at night so we could get an early start the next morning. Even the time he picked me up at the airport in Knoxville and took me to the hospital for emergency appendicitis surgery after I became sick on flight. Visited me while in the hospital and helped me get back to the airport and fly home. That's a true friend! Thank You! Thank You!

Join us April 27th for a tremendous weekend in Knoxville! Let us know if we can assist you in any way!

Dennis Adams

OUTFRONTCATTLE.COM

THE 2024 APPALACHIAN CLASSIC SALE IS DEDICATED TO

Floyd Nampler

IN HONOR OF HIS RETIREMENT AFTER 31 YEARS OF SERVICE TO THE CHAROLAIS BREED

Floyd,

We wanted to dedicate this year's Appalachian Classic Sale to you as a token of our appreciation for your service to the Charolais breed. This sale and many more sales across the nation have benefited from your knowledge, friendship, and effort. Your efforts to help and support all breeders young and old to improve their herds, have success in the showing, promote their program, and make breeding decisions are so appreciated. Your vast knowledge of the purebred industry has been a great asset that you shared with us freely, not to mention the significant effort in obtaining many of the great photos you took of our cattle to help promote breeders. You definitely had a talent with your camera!

We wish you the best in your retirement after 31 years, thought it seems like just yesterday you were getting started. I know it has been many a mile, countless days on the road without your family, and meals on the run. Your great friendship will carry on with all of us, and we appreciate all you have meant to this breed. You and your family will be with us always and we will keep you in our prayers! Thank You! Vaya con dios!

VCR SIR DUKE 914 PLD CCF LADY GERMAINE 718PET This legendary cow can have volumes written about her and her progenies. One of the all-time most influential cows in the Charolais breed. She was the first cow family listed in the M6 Dispersal sale. His footnote on the dispersal was "the Germaine Family is built to last". She topped the 2016 M6 sale with her daughter at \$15,250.00. But her offspring like M6 Ms New Germaine 484 sold for \$36,000, and her heifer calf for \$\$9,000.00. A full brother sold for \$30,000. Another heifer, 579, \$19,000, to just mention a few in the dispersal sale. The offspring of 1145 in the Dispersal sale totaled up \$167,500.00. And since then, many more of her sons and daughters have topped sales or at the very top, including the 2023 Southern Connection, a bull sold for \$7,500.00, 2021 Appalachian, a son for \$6300.00 to top the bull sale. In the 2022 Appalachian, a daughter, 585, produced the top seller, an open heifer at \$5,000. This cow family is one of the most prolific in production and profit! A fantastic opportunity now with lots 1-8 of maternal sibs out of 1145 and different breed leading sires! What an unbelievable opportunity to invest in a well thought-out and proven program to lead your herd into the next phase of more profit and proven program!

Sells Fertility, Homozygous Polled, PAF, and 100K Tested! Selling 3/4% Interest and Full Possession in this remarkable herd sire! He ranks in the top 15% for CE, 35% WW, 30% YW, 15% Milk, 1% MCE, 20% MTL, 3% Marb, and 25% TSI. Blue Value daughters have become a real go-to for superior broodcows. They milk great with quality udders, very productive and fertile, and maintain fleshing ability. Combined with 1145, this sire should have unbelievable ability to produce a herd of high-quality females. And with his top Marbling ability you bring a bigger option to the genetic evaluation. Plus, more frame that is needed today!

Open Heifer. Same great Del Rio on top of pedigree. Bottom side features two of the most winning show sires in the breed, M&M Outsider 4003 Pld and TR Mr Fire Water 5792R. The Welcome Grove Nancy 38U is working in the Maupin's Circle M Charolais. With her phenotype you can definitely see the show side of this superbly made heifer. Her volume, thickness, and sound complete lines makes her a great winner!

P.E. bred 7/7/23 to 7/23/23 to Reaves Mr Added Value 2255, observed bred 7/23/23, safe in calf. What a powerful cow here, big, deep-bodied, good bone, long sided, good milking ability, abundantly muscled yet very feminine and clean lined. Notice the Impressive 405 donor cow on the bottom and the great Three Trees Vanessa 3849ET donor cow of Presley Farm's. The Oakdale Duke 9003 was a sire of Trait Leaders!

Sells Open, ready to breed. Stout made show prospect, halter broke and gentle. Definitely will be an awesome broodcow. The Blue Value's have developed a great reputation for their productivity and broodcow status. She ranks in the top 15% for Marb EPDs! Another great Blue Value trait! A very good pedigree of M6, Double-H, and Faraway genetics on the bottom side!

TASK FORCE WORKING TO CAPTURE VALUE FOR COMMERCIAL PRODUCERS OF CHAROLAIS-INFLUENCED CATTLE

BY SHARLA ISHMAEL

There aren't too many scenes that'll make a commercial cattle producer – and their banker – prouder than looking at a stout, growthy, smoky calf standing almost as tall as his black or baldie mama. The picture can change depending on the location of the ranch – he might be looking at the same scale-busting calf next to a good tiger-striped mama down south.

Either way, producers have long known that capitalizing on the magic of heterosis compounded with the use of a terminal-breed sire is a profitable way to max out the scales at weaning, as yearlings or fat cattle. With the nation's Jan. 1 beef cow inventory hitting one of the lowest numbers seen in recent history due to widespread drought, it is more important than ever for the commercial rancher to take advantage of a bullish market predicted for calves and feeders over the next few years.

With a much smaller herd and the need to go slow with restocking as the land recovers from drought – hopefully before the next one hits – every pound will count. Unfortunately, the market is set up today based on premiums for black-hided cattle and given that the cattle cycle has been in the heavy-supply stage, where every segment after the ranch has enjoyed the ability to be choosey, it has meant good cattle of all colors don't always get sold for the value they bring to the industry at every stage.

It's a problem Charolais seedstock producers are not willing to deal with any longer. So much so that the American-International Charolais Association has created a task force of progressive breeders and outside consultants to explore every possible opportunity to make sure their commercial bull buyers get additional or new market access for their calves.

"Numerous closeout sheets from Charolais-influenced cattle harvested at Tyson plants in the past two years document these cattle produce carcasses that compete extremely well on the rail," says AICA Executive Vice President Clint Rusk. "It is imperative this carcass value be reflected in the live market."

Charolais breeders are not alone in their quest to fix the problem.

"Our task force is already working with another task force led by Tom Brink, chief executive officer of the Red Angus Association of America, to explore a change in the way feeder cattle are marketed," Rusk explains. "Our Charolais breeders agree with those who say feeder cattle should be marketed on their genetic merit rather than the color of their hide."

Last year, Brink released an important white paper with results of a survey of feedlot managers that shows they also see a great need for change in the feeder cattle market. When asked if black-hided feeder cattle are superior to non-black cattle of equal weight, sex and health history, 75% disagreed with that statement.

In fact, 92% of the survey participants agreed or strongly agreed with this statement: "For the beef industry to continue improving its overall cattle quality and value, hide color should be replaced with more objective genetic criteria as a key price-determining factor(s) in the U.S. feeder cattle market."

"Numerous closeout sheets from Charolaisinfluenced cattle harvested at Tyson plants in the
past two years document these cattle produce
carcasses that compete extremely well on the
rail," says AICA Executive Vice President Clint
Rusk. "It is imperative this carcass value be
reflected in the live market."

What will it take to make those changes so smoky or cream-colored calves can get premiums for their performance? For the Charolais task force, all options are on the table, from feeder cattle marketing programs, better utilization of existing grids for Charolais-influenced cattle, data gathering from private sources to solidify how these cattle excel in terms of feed efficiency, average daily gain and overall performance at the feedlot and packer in terms of both red meat yield and quality grade on the rail.

They are working on getting Charolais-influenced cattle into the latest sustainability research projects to study their efficiency advantages relative to other breeds. If carbon capture and greenhouse emissions play a role in the future of beef, breeders on the task force believe the breed's natural efficiency and performance will be a competitive advantage in that arena.

Continued on next page ▶

The task force has met with major packing company executives to determine how Charolais-influenced cattle are perceived on their end and what the association can do to help increase demand for the cattle at the retail level. They've also initiated discussions on private branding with meat marketing experts.

Basically, these breeders are reaching out to every segment of the industry to lay groundwork leading to a premium structure for Charolais-influenced cattle at the commercial level. Charolais-influenced cattle are already well-liked in the industry. Ranchers appreciate the cattle for their performance, feeders love them for their efficiency and packers value their cutability, ability to grade Choice or better, as well as putting more product in the box. The task for these seedstock folks is to find ways to capture the real-world value of Charolais-influenced calves.

Marcine Moldenhauer is one of the industry experts AICA has tapped to advise the task force. She has experience both as a breeder of Charolais, Red Angus and Maine-Anjou, 25 years in cattle procurement as a cattle buyer, strategic supply manager and leading the premium sales and marketing team for a major packer. For the last 15 years as owner of Meatlink Management, LLC, her livestock and meat business consulting firm, she has worked with multiple companies in multiple countries, breed associations, chefs and specialty fed cattle beef programs on the challenges and how to approach creating and supplying a branded beef program.

"Packers know the value of Charolais-cross cattle, they do cutting tests, they track performance, they know," she explains. "They know Charolais-cross are going to yield from live to carcass and from carcass to the box; the packers know these cattle have very favorable quality grades with low yield grades. They know these cattle are a good value. However, because over the last 10 years or so there have been plant closings and increased supply, the packers have simply not had to pay more for these types of cattle."

For years, USDA has only recognized "Angus" as 51% black hided, those cattle that are percentage Angus (red or black), have not been accepted into "Angus" brands, such as black-nosed Charolais or the blonde-hided cattle. She believes in order to compete with that, it's necessary to cultivate either a foodservice, retail or a small restaurant partner – better yet one of each – that understands the value and sees an opportunity for them.

"This is why Cargill, for one, created their Sterling Silver brand over 25 years ago," she adds. "The other challenge is to create multi-tiered brands where Charolais-cross cattle that are USDA Select or higher all have a home in a branded beef program. You want multiple programs for the Charolais-influenced cattle to go into. The reality is the packer is not going to find your customer for you, that will be the breed's job."

One of the breeders on the task force is Brett DeBruycker of Montana, who says the Charolais association is up for the challenge.

"We're being very aggressive in fleshing out the different opportunities," he says. "I think the association is refocusing on what is most important to our business, and that is the commercial cattle producer. I'll admit we fell behind in promoting what our breed can do.

"For instance, I have documentation that pink-nosed, straightbred Charolais cattle qualified for the following premiums in the summer of 2022. Steers received \$80/head and heifers received \$85/head on the U.S. Premium Beef grid. These cattle added value to the industry by grading and yielding well on the rail," he adds.

"You've got to hand it to Angus, they were out helping packers sell meat, spending money as an association talking to retailers while we, as a breed, were focusing on breed improvement and adding value to our customers and the industry through increased performance, efficiency and carcass quality," DeBruycker adds. "Hindsight being 2020, we should have been helping packers sell Charolais beef. One of the things I have learned on this task force is how vitally important it is for our breed to talk to consumers."

A few years ago, he took a phone call from a gentleman from France who recently moved to Washington state. The man was very excited to have found DeBruycker Charolais online because he had been looking for Charolais beef since moving to the U.S. The man told him in France, Charolais is considered a delicacy and everybody there wants to eat it. DeBruycker says more U.S. consumers would share that fondness for beef from the white breed if they got a chance to taste it and know where it came from.

Mark Nelson is also advising the Charolais task force, and he too has seen the other side of the business having ran the Angus America program for Cargill for seven years. He says part of what the breed needs to keep its eyes on is being ready for the future, when the cattle cycle turns again and cattle numbers are on the rise.

"I think in the next five years, ranchers will benefit from high prices due to short supplies," he says. "But we all know those high prices won't last. So, the breed needs to have something up and running on all cylinders by then so folks with Charolais-cross calves will be able to use them when they really need them. There is so much potential with this breed. Charolais is the kingpin of what they do. The cattle have really been begging for their breeders to do something like this because the cattle merit it."

So, from a commercial perspective what does this mean for their Charolais-influenced calves being born now? It means those white bulls in the pasture will bring home gold for you now by putting extra pounds on the scale when every pound is likely to be worth much more than it has been when cattle numbers were high. And, if the Charolais task force does the job it hopes to accomplish, you'll have not just more pounds to sell in the future but also more premiums and demand for those high-performing calves. Stay tuned. •
